# ALI GHAFFARIANN

## DETAILS

**ADDRESS**

Mashhad
Iran, Islamic Republic of-
Military Service: Exempt

**PHONE**

+989338169465

**EMAIL**

alighaffarian9@gmail.com

**DATE / PLACE OF BIRTH**

20 - 11 - 2003
Mashhad

Writeups

My CTF Challenges

## SKILLS

linux

TCP

Scapy

wireshark

network security

## PROFILE

Curious and hands-on learner, especially interested in network traffic analysis and  CTF competitions. I also enjoy teaching and breaking down networking concepts to make them easier to understand. Documenting what I learn helps me—and hopefully others—make sense of it all. I value integrity and aim to take on only what I know I can deliver.

## TECHNICAL PROJECTS

- Simple DNS firewall using nfqueue and scapy ( https://github.com/AliGhaffarian/dns-firewall )
- Device connectivity troubleshooting using bash ( https://shorturl.at/DSC15 )
- Implemented DHCP starvation using scapy ( https://github.com/AliGhaffarian/dhcp-starvation-using-scapy )

## CTF

- Played several CTF competitions as a member of FlagMotori ( https://fmc.tf ).
- Developed the skill to detect and extract encoded data in protocol headers and vise versa.
- Learned how to express the chain of thoughts through making writeups.
- I enjoy creating CTF challenges to share my knowledge.

## CURRENTLY STUDYING

- Linux kernel syn cookie handling : /net/ipv4/syncookies.c

bash

Python

pyroute2

netlink

Docker

Git

C

pytest

## LANGUAGES

English

## EXCITED TO LEARN ABOUT

- USB protocol and designing security oriented peripherals
- Linux kernel
- Designing kernel modules/device drivers

## EDUCATION

Quchan university of technology

2022 — Present
